

'Killer Mig' Will Be Displayed in Torrance

The famed "MIG Killer," the North American F-86 Sabre Jet, will be on exhibit in Torrance as part of the city's salute to the "Golden Anniversary of Air Power," October 14-18.

The F-86 on display will be a wingless cut-away version of a part of the fuselage has been removed so spectators may view the jet engine, flight controls and other intricate equipment. A special ramp has been built on the planes trailer so visitors may closely examine the cockpit and the life-saving pilot ejection seat.

The Sabre Jet proved its mettle in North Korean skies by completely mastering the Russian-built MIG-15 in aerial combat. Air Force officials state that all 39 "Aces" in the Korean conflict flew F-86's.

The craft holds the world's official speed record of 715.7 miles per hour, broken later by a sister craft—the advanced F-86D.

Sponsoring Chamber of Commerce officials said the Sabre Jet will join the Ryan "Firebee" Drone and also the X-7 Rocket in a public display to be located at El Prado and Cravens in downtown Torrance. The Lockheed X-7 was announced just last week as the missile that smashed all speed records with runs of over 2500 miles

Enrollment At 21,379 In Schools

On May 8 of this year, Dr. Warren Hamilton, Director of Special Services for the Torrance Unified School District predicted school enrollment this October would be 21,379.

In figures released today, Hamilton's prediction was off by some 21 students. The official figure stands at 21,358. In showing the breakdown, Hamilton said that 17,530 elementary students were enrolled along with 3,828 high school students.

per hour — four times faster than the speed of sound.

A few reservations are still available at the Chamber of Commerce office for the Air Force Banquet scheduled for Thursday, October 17, at Ricks Restaurant.

Move to End Subsidence Problem

A resolution urging the State Legislature to lend every assistance toward the solution of the subsidence problem in the Long Beach-Los Angeles harbor area was presented to the Board of Supervisors Tuesday by Supervisor Burton W. Chace.

Chace's resolution, unanimously approved by the Board of Supervisors, was directed specifically to the Assembly's Interim Committee on Manufacturing, Oil and Mining which is slated to start a series of hearings on the subsidence problem in Long Beach this week.

Chace pointed out in his resolution that land-sinking in the area has occurred to a depth of as much as 24 feet and is continuing to sink at the rate of one foot a year, posing a threat to the safety and lives of thousands of persons who work in the area.

The resolution further pointed out that the subsidence now threatens the Naval Shipyard, vital to the defense of California, which employs 6,500 people.

Chace stated that unless an adequate State law bringing about a solution to the subsidence problem is enacted, the Federal Government will close the shipyard in 1958.

"The subsidence, Chace said, also poses a serious threat to numerous other large industries, vital to the prosperity of the people of Los Angeles County now located in that area."

Oil Fields

(Continued from Page 1)

Powell said that his office had jurisdiction over some 573 wells in the area encompassing Torrance. In the last few months, his agent has investigated some 90 violations of which 25 have been corrected and about 39 have been partially corrected.

But, he's the first to admit that violations occur continually and his staff is attempting to keep abreast of each violation reported.

He added that the problem hardly exists with the major oil companies which maintain wells in this region. The violations, according to Powell, are usually connected with small independent operators.

When a complaint is registered, the first step taken by Powell's office is to make a survey and evaluate the violation and the danger. Then they must contact the owner or the party in possession about the violation. Usually, there is an acknowledgment of notice of violation on the part of the well owner who in most instances complies to abate the hazard.

MOVING PARTS CAN KILL

However, investigators say many times, it is impossible to determine who is legally responsible for the well, and this may take months. Powell's authority however, is such, that a real dire menace may be acted upon by virtue of the police powers vested in his office.

"When a violation is noted," Powell said, "the important thing is that a citizen call or write us immediately. We have a pattern mapped out by which we are attacking the problem. But, we'll deviate from this pattern to handle any complaint where the violation is so flagrant that injury or death may result."

Accompanied by a Press photographer, this reporter went out to investigate what, one irate citizen called a "Potential open and notorious torture area."

This citizen is the parent of 4 small children who lives in the region in question. Her concern was for the safety of her children and the children of others.

Upon approaching the area, we were immediately accosted by an irate well owner charging that we had no right to be present on the open area in question. He vehemently charged that we (the Torrance Press) were guilty of sensationalism, that we really didn't have a gripe, that we were only out to sell newspapers. He angrily denied us permission to take pictures. However, we already had enough to prove our point.

It is incumbent upon us as citizens to take a few lessons from the past where serious injuries have occurred to children. With a little foresight, we can prevent future injuries and yes, even death . . . of innocent children, most of whom, too immature to recognize moving death traps.

Accountants Celebrates To Tour Plant Birthday

On October 10 the members of the Long Beach Chapter of the National Association of Accountants and their invited guests will make one of their semi-annual plant inspection tours of the McCulloch Motors Corp. at 6101 W. Century Blvd.

A first hand opportunity to observe the manufacturing of this famous line of small gasoline engines and their well known line of chain saws will

Mrs. Joseph H. Maxwell, 104 Via Colusa, Hollywood Riviera, was entertained at a dinner party at the Cafe de Paris in Los Angeles last Saturday evening. This occasion was her birthday and she had been feted at several parties during the week.

be accorded the touring group. The plant tour will be concluded by dinner on the grounds.

Poster-Essay Contest at Narbonne

Torrance optometrist, Dr. Eleanor Thill, has been appointed representative to Narbonne High School in Lomita for the Vision Conservation Institute's high school poster and essay contest, it was announced today by Dr. Pauline Dowaliby, chairman for the Los Angeles County area.

The contest, now in progress, is open to all California high school students. First, second, and third place winners for the state will receive scholarships of \$200, \$100, and \$50, respectively, and each will be awarded personal certificates and plaques for their schools.

Theme of the contest is "Safe Driving Through Better Vision—Help Save Lives." Preliminary judging will take place December 9 to 13.

Sundin

(Continued from Page 1)

Education Association, he is at present its regional vice-president in this area, the chairman of its audio-visual aids committee, and the chairman of its committee to rewrite the California state vocational tests for printing instructors.

A graduate of Santa Barbara State College, the holder of an M. A. degree from the Colorado State College of Education, and the winner of several outstanding student awards, Sundin has been affiliated with the Los Angeles City Schools since 1941. He resides with his wife and two children at 4340 Via Frascati, San Pedro.

GOLF PLAYERS MEET

The golf section of the Torrance Woman's club meets every Tuesday at Alondra golf course. Members may make arrangements for lessons.

Child Psychologist to Give Lecture Series

Dr. Barney Katz, noted clinical and child psychologist, will give a series of lectures on Monday evenings at 7:30 p.m. in the Torrance High school auditorium beginning October 7.

This series of lectures entitled "Foundations of Family Living" is sponsored by the Torrance Evening High school and will cover such subjects as: October 7—"Popular Misconceptions in Child Training"; October 14—"Causes of Personality Maladjustment"; October 21—"Modern Methods of Child Discipline"; and October 28—"Helping Your Child Develop Successfully."

Dr. Katz is a graduate of the University of Southern California where he received his Doctorate degree in 1939 and has lectured for several years. Besides many articles appearing in psychological publications, he is the author of numerous books of popular interest: "How to Be a Better Parent," "Mental Hygiene in Modern Living," "Understanding People in Distress," and "The Psychology of Abnormal Behavior."

Free tickets may be obtained in advance at the Adult Education office, 2200 W. Carson st. (Torrance High school) after 1 p.m. or by calling FA 8-2272. A limited number of tickets will also be available at the door. The lectures will give county institute credit to teachers.

CCBA Holds Meet Tuesday

Next meeting of Carson Civic Betterment Association will be held at White Junior High School, 220th and Figueroa, Tuesday October 8, in Multi-Purpose Hall at 8 p.m. Meeting will be open to the public.

Main items for discussion will be citations and reports regarding traffic conditions on Figueroa Street and Freeways. Also a report about a Neighborhood Park. The guest who will appear

Electric cooking keeps more juice in roast chicken — because it's flameless!

When you cook electrically there's no draft of constantly changing air because there's no flame. (Flame, you see, needs air to breathe. So a flame-heated oven constantly inhales dry air, exhales moist air — literally cooks meat in a hot draft that evaporates good juices.) In an electric oven there's no draft of dry air. You cook with moist heat. As a result, more juice stays in the meat . . . and the meat tastes better.

Electric cooking is far cooler, too. As much as 16° cooler. The reason is obvious: electric cooking puts the heat directly into the food, not into the room. Electric cooking is cleaner, too, because it's flameless. There are no by-products of combustion to dirty walls and darken your bright pans. Truly, it's the only modern way to cook. Why not see your appliance dealer for a demonstration of the new electric ranges?

SOUTHERN CALIFORNIA Edson COMPANY

LIVE BETTER — ELECTRICALLY!

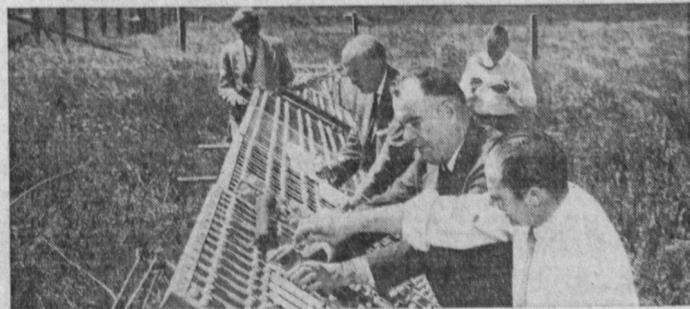

Did you know? Flameless electric cooking costs about \$1.50 a month for a family of 4

How telephone men fight metal-eating winds

Tony Gurnari and Vic Sculatti (left and right above) are part of a telephone metal-testing team. They're prying open what we call a terminal box. It's like the one to which telephone wires from your house are connected. But this one is frozen shut by a hungry metal-eater called corrosion. Corrosion can be caused by salt-laden

wind, fog or ocean spray. It can rust, pit or crack tough metals. So we test to find metals that are economical to use yet resist corrosion. Telephone men also study other destroyers like wood rot, insects and even gnawing animals. By controlling such destroyers, we save thousands of dollars worth of equipment each year.

At the test site, Tony and Vic are at work learning new facts about corrosion by exposing metals to ocean winds and other elements. Their tests are part of our

effort to lengthen the life of every kind of equipment serving your phone. At the same time these tests help us keep your service dependable.

Working together

to serve you better . . .
